## PREAMBLE

### Right to Information Act- 2005

This handbook of "Right to Information Act- 2005" is prepared to facilitate the implementation of the act by giving information about the Pest Control Department, F/South ward to the Citizens.

#### Objective

- The Objective of this handbook is to provide information to citizens and transparency of information.
- All Citizens shall have the right to information.
- A person who desire to obtain any information under this act, not available in this hand book shall make request in writing in English, Hindi or in Marathi, accompanying such fees as may be prescribed, to the **Public Information Officer** of this department specifying the particulars of the information sought by him or her.

All the information furnished in the manuals is subject to addition, alteration and modification as and when necessary.

Sincere efforts are made by Pest Control Officer F/South ward in disclosing all information available in his office so as to facilitate citizens to make themselves aware of procedural part, documentation required, fees, deposits to be made etc. for various permissions that rest with office of the Pest Control Officer. Thus saving valuable time & frequent visits to F/South ward office. These efforts are made under Right to Information Act- 2005.

## **(1) INTRODUCTION :**

The Insecticide Branch of Public Health Department is a derivative of the original Malaria Department, established in the then Bombay Municipal Corporation as per recommendations of Dr. C. A. Bentley, who took over the investigation in process regarding malaria by his military predecessor since Capt. F. V. Mackie, I.M.S. (1908) & Capt A.G. Mc Kendrick, IMS (1909) & Others.

As originated from the malaria problem of Mumbai and also as a present need, malaria eradication remained the soul behind the functioning of the department. At present, however, the department is functioning in a much diversified manner, but retaining its original Identity by keeping malaria as the top and constant priority.

## **(2) FUNCTIONING :**

The task of malaria vector control is directly undertaken by the governments of states, whereas mosquito nuisance control is an obligatory duty of the local self-government bodies. In case of Mumbai both the problems are dealt with by the Municipal Corporation of Greater Mumbai.

Priority-wise various functions of the insecticide branch are as follows:-

- (A) Malaria vector control.
- (B) Dengue hemorrhagic fever vector control.
- (C) Mosquito nuisance control (Filaria vector)
- (D) Fly control.
- (E) Rodent and flea control.
- (F) Cockroach control.

### **(A) MALARIA VECTOR CONTROL:**

Malaria is a communicable disease caused by certain parasites of the Genus – Plasmodium. It is caused by the bite of an infected female anopheline mosquito.

The statement of Major G. Covell in his report “Malaria in Bombay, 1928” is equally true even today with all the great changes in the area, population, living habits, standard of living and development with fast urbanization of the city of Mumbai.

“There is no natural malaria in Bombay. The chief reason being the absence of natural streams. *Anopheles stephensi* is the only species of mosquito which plays any appreciable part in the transmission of the disease in the island and its breeding places are exclusively man made, this mosquito is the one malaria carrying anopheline in India

which is able to adapt itself to life in a large city in the case of other carriers facilities for breeding suitable to their needs are not produced in urban areas. But *A. stephensi* is the great well and cistern breeder of India, and unless this breeding places and others of a similar nature are rendered permanently mosquito proof it will continue to flourish even in the heart of the city.”

Based on the above facts and also that *A. stephensi* requires fresh water, preferably constantly renewed, or water bodies which are in darkness or constantly exposed to sunlight to breed in. Mosquito vector control is sequentially designed as below:

- (1) Reduction of breeding sources
- (2) Engineering methods– major and minor for total elimination of breeding potentialities
- (3) Biological methods– zoological & botanical
- (4) Chemical Methods
- (5) Legal methods

Community participation is an indispensable factor in any public health program. In metropolis like Mumbai no administration can depend on community participation based only on public education especially when it comes to malaria. Considering the scientific facts involved in vector mosquito biology, mandatory participation of community is achieved by adopting legislative measures the then state of Bombay was the first government to adopt and implement Legislative measures for the control of the vector mosquito.

**(B) DENGUE HAEMORRHAGIC FEVER VECTOR CONTROL:**

There are 2 species of *Aedes* mosquito in Mumbai which can play a role of vector in dengue (Dengue Hemorrhagic fever virus transmission from an infected person to a healthy person). Fortunately the habit and habitat of these species of mosquito are such that, mere reduction of temporary breeding places along with confined thermal fumigation even can work as a method of total relief during monsoon or focal outbreak.

**(C) MOSQUITO NUISANCE CONTROL (FILARIA VECTOR):**

In case of nuisance causing mosquitoes, the major role is played by *Culex quinquefasciatus* which is also vector species for Filaria. This species is a typical breeder of polluted water. The breeding sources are open channel drains, nallahs, septic tanks, low lands, grass plots, aqua privies, storm water entrances, creek land etc. The selection of method for the control of this mosquito more or less remains the same as those of malaria vector but differs with the size and nature of breeding sources.

#### (D) FLY CONTROL:

Flies are the commonest and most familiar of all insects which in close association with man and occur throughout the year abundantly. Flies should be regarded as a sign of insanitation and their numbers as an index of that insanitation.

The fly *Musca domestica* found in Mumbai is called as housefly. Its breeding places vary from fresh horse manure, garbage to decaying foods and vegetables. They are prevalent near dwelling houses, restaurants, hospitals, cattle shades, slaughter houses, dumping grounds, markets etc. The span of metamorphosis of fly is variable as per the environmental conditions and nature of breeding grounds.

The flies transmit diseases like typhoid, Diarrhea, Dysentery, Cholera, Gastro-enteritis etc. The control of flies can be achieved by using various types of Insecticides in operational methods ranging from residual sprays, space sprays and dusting. However, constant control can be achieved by eliminating their breeding places and by bringing an overall improvement in the environmental sanitation.

## **(E) RODENT CONTROL:**

Rats are a part of man's environment and because of its close association, they are not only hazard to health but also cause great damage to buildings, food and other commodities. Apart from its nuisance value, rat is responsible for diseases like Plague, Leptospirosis, Rat-bite fever, Salmonellosis (Food poisoning), etc. Mumbai has remained an active port since Historical times and hence is in constant danger of Plague epidemics. During the Plague threat of 1994 in Mumbai, this branch has played a very important role in preventing the probable entry of Plague incidence in Mumbai. The invention of anti-plague vaccine was done at the Municipal Rat Destruction Unit at Haffkine Institute, Parel. Regular sampling of various Rat species for ascertaining the Index of the vector flea and dissection to assess the susceptibility to plague bacilli is carried out.

The common species of rats in Mumbai are:-

- 1) Rattus rattus :- Roof Rat
- 2) Rattus norvergicus:- Sewer Rat
- 3) Rattus wroughtoni :- House Rat
- 4) Bandicota bengalensis :- Field Rat
- 5) Bandicota indica & Bandicota Gegantia :- Field Rat
- 6) Mus musculus :- House Mouse
- 7) Suncus caeruleus :- Common House shrew
- 8) Suncus murinus :- Shrew

The common methods of rat destruction are Physical and Chemical.

Additionally Night Rat Killing is a unique method of rat control used only in Mumbai.

## **RAT LABOUR BOUNDARY F/SOUTH WARD**

LABOUR 1:- Tata Compound, Dharati Gully, Gautam nagar, BDD Chawl, Naigaon

LABOUR 2 :- Spring Mill, Sewree X Road, Bhoiwada Gaon, Bhim Nagar, TB Hospital

LABOUR 3 :- Lalbaug, Parel, Jijamata Nagar, D.L.Marg, Bawla Comp, Malavankar marg.

LABOUR 4:- T.J.Road, Sewree Koliwada, Indira Nagar, Paradhi Pada, Hey Bunder Road

## **(F) Cockroach Control:**

De-cockroaching activity is carried out only in City wards i.e. A to G/N ward. It includes chemical treatment of inspection chambers in selective localities. This activity also has public health significance as cockroach is mechanical carrier of infection. However presently this activity is not carried out by PCO F/South Department.

**CONDITIONS /SPECIFICATIONS GOVERNING PERMISSION TO WATER STORAGE TANKS  
(CISTERNS)**

REFERENCE :- SECTIONS 274, 274(A) & 381(A) OF THE M.M.C.ACT.

**The body of the tank:**

1. The cisterns should be made of wrought iron, mild steel, R.C.C. or any other material sufficiently thick and strong to withstand the Wight of an average and when he stands the top of the tank.
2. The side sheet, the bottom sheet and the top sheet should be properly bolted or welded to leave no gaps or crevices at any point.
3. The top sheet of the tank should be propped by the permanent fixtures from the inside to prevent sagging. There should be no depression on the top sheet which is likely to hold or retain water.
4. The cylindrical tank should not be more than 2.25 mm in height including the height of the foundation on which it may be rest.
5. The cylindrical tank more than height should be installed horizontally or proper foundation.

**The Manhole and the cover assembly:**

The manhole cover should be fitted on the masonry elevation at least 12cm above the level of the top slab with it's collar rim grouted in the elevation with vertical bolts.

6. There should be a circular manholes on the top sheet and cast iron rim with collar should be firmly fixed on it.
7. The rim with collar should be cast in one place.
8. There should be no gap between the top sheet and collar, if gaps exist they should be caulked with lead wool or molten lead or any material approved by the certifying authority.
9. The manhole should have a properly fitting cap cover of the cast iron cast in one place.
10. The vertical edge of the cap cover should rest on the collar around the manhole with the rim of the latter toughing the inside of the cap cover to afford a double resting arrangement.
11. In case of masonry cisterns, the manhole collar ring should be visibly above the top level of the cisterns.
- 12.The cross bar of the cap cover should be short so that the hinge and the hasp is as close to the lid as possible to ensure proper closing of the lid.
13. The lid of the cisterns should always be reverted.
14. If the cistern is more than 3mm long an additional manhole cover should be provided to facilitate sampling at all corners with a sampling device of 1.5mm length.
- 15 .The feeding, overflow (warning) and take pipes should be provided with check nuts from

inside and outside to prevent formation of gaps and to avoid leakage.

16. The overflow pipe should be protected at its free end by a perforated copper or brass plate, and the perforated plate should be within the hand reach to facilitate inspection.

#### **The access.**

17. All cisterns with height more than 1.2 should be provided with a fixed sturdy iron ladder.
18. The upper end of the ladder should be firmly fixed to the top sheet. They should be provided with side supports.
19. The iron ladder exceeding 2.5m.m.in height should be provided with side supports.
20. The ladder exceeding 8m in height should be provided with hand rails on both sides.
21. If access to the terrace is by means of a wooden staircase, it should not remain open and exposed to the sun and rain.
22. If the cistern is under some cover or shelter, there should be sufficient space between the cistern and the roof to enable easy inspection and sampling.
23. In the case of overhead water storage tank, sturdy and safe iron or R.C.C. platforms should be provided at suitable intervals, instead of straight ladder from bottom to the top.

#### **The Suction Tank :**

24. The top of the tank should be raised above the surrounding ground level by a minimum of 45 cm. If the depth of the suction tank is more than 8 feet then there should be provision of safe, easy and permanent means of access (without obstructing the proper closure of the lid cover) from top slab of the tank to the bottom of the tank
25. The pump room should invariably be connected to the house drains by means of a gully trap. The pump foundation hollows should be filled in to the top circumference.

#### **Special Requirement:-**

26. Horizontally installed cylindrical tanks should have a rectangular platform serving as the resting surface for cover assembly. The platform should be spacious to accommodate fixing of a ladder.
27. Vertically installed cylindrical tanks with convex top should have an appropriate railing along the top of circumference.
28. The manhole size and the cover assembly components should be of standard dimensions and easily available in the local market.
29. H.D.P.E. tanks should be so fabricated as to avoid any degree of sagging of the top after fixing of a cover assembly or on climbing over it during the inspection
30. The distance between the adjacent manhole cover and between any manhole cover and the side wall of the suction tank should not exceed 5 feet.

**Undertaking-cum-Bond of conditions governing Fountain Permission**  
**(To be submitted on Rs.500/- Stamp Paper)**

Draft conditions (framed under Section 479 (1) of the M.M.C. Act) governing the permission to be granted under Section 381 A (1) of the M.M.C. Act for Ornamental Tanks, Water Fountains, Rock Garden Fountains, Artificial Water Falls etc.

1. I/We am/are aware that the Construction or installation of any structure such as Ornamental tanks, fountains, ponds, garden tank, trough, channel, etc., where water is played or held shall not be permitted or allowed to be put up or constructed on upper floors, or on the terrace indoors.
2. I/We shall see to it that the bottom of such Ornamental tanks, fountains, ponds shall be above the ground level and sloping towards the outlet flush with the bottom to facilitate complete draining upto the last drop. The outlet shall be reconnected to the Municipal Drain.
3. I/We shall see to it that where the water is circulated and made to fall from a height over the troughs, cups or ledges, they shall be provided with adequate slopes to disallow any collection of water when the fountain stops playing.
4. I/We shall see to it that all the vertical and horizontal surfaces over which the water runs or falls shall be perfectly even and smooth to disallow formation of pockets likely to hold or trap water or in any way be a hindrance at the time of emptying.
5. I/We shall see to it that there shall be built in automatic arrangement to drain out entire quantity of water into a mosquito proof sump on every occasion the fountain stops playing for the day. The mosquito proof sump shall be provided with standard pattern Municipal approved cast iron cover of round shape and the sump should not have gap opening or crevice exceeding 1.5 mm.

**OR**

The entire quantity of water shall be drained out directly into the Municipal Drain, the moment the fountain stops playing in a manner stated under condition No. 2.

6. I/We shall see to it that the entire surface of water shall remain sprinkled or agitated when the fountain is being played.
7. I/We shall see to it that the whole system shall be kept dry once in a week on the day of inspection as would be communicated.

8. I/We shall see to it that no aquatic plants should be introduced or grown which may prevent observance of weekly dry day.
9. I/We am/are aware that only the person having legal possession of the premises is eligible for such permission and applications made by other persons such as Builders, Developers, Architects, Contractors, etc. will not be considered. Applications must accompany with proper drawings, plans of the intended structures showing in take and drainage arrangement for water, otherwise same will not be considered.
10. I/We am/are aware that the permission holder shall pay the prescribed fees for the issue of permission and renewal of the same for all subsequent financial years as will be chargeable in accordance with the schedule fixed by the Corporation and in force on the day of issue or renewal of the permission. Fees paid may be liable to be revised even after the issue or renewal of permission and in case if the same are revised by the Corporation, the permission holder shall then be liable to make good the difference of fee in accordance with an intimation in that respect which will be communicated to him, failing-which the permission will be treated as cancelled.
11. I/We am/are aware that the permission is valid from the date of issue till the end of March of the same year and it shall be renewable for every subsequent financial year.
12. I/We am/are aware that the permission, when its fees are received by an instrument will be valid only on realization of the instrument, till then, or, if the instrument is dishonoured on any account, the party concerned will be deemed to be without permission and will be dealt with as such.
13. I/We am/are aware that the permission fee is non-refundable.
14. I/We am/are aware that the permission holder shall get his permission renewed in the month of March every year for all subsequent financial years, on payment of prescribed fees. No notice will be given to him for renewal of permission. If he fails to pay such fees within the stipulated time, he can still get his permission renewed if so allowed by the Competent Authority of the Corporation, by paying compensation charges as may be fixed by the Corporation in addition to the usual permission fees. In the absence of such payment the permission stands automatically cancelled and he will be liable for prosecution and his claim for renewal of permission shall not be considered.
15. I/We am/are aware that this permission does not absolve the permission holder from the obligations arising out of any other provisions of the Mumbai Municipal Corporation Act or other legislation in vogue and the permission is liable for suspension, revocation or cancellation, if so required in that connection.

16. I/We am/are aware that the permission holder shall not exceed or violate or in any way infringe the conditions of this permission. In such cases, the permission holder will be liable for prosecution and/or revocation of permission.
17. I/We am/are aware that the permission holder shall produce the permission for inspection purpose whenever demanded by duly authorized officer or offices of the Corporation.
18. I/We am/are aware that the permission holder shall inform the Insecticide officer in writing about any intended change in the permission at least one month in advance from the date of such intended change or from the date of expiry of permission whichever is earlier.
19. I/We am/are aware that the permitted premises shall be made available for inspection by the permission holder or his agent at any time to any duly authorized officer of the Corporation immediately whenever required.
20. I/We am/are aware that the permission holder is liable for prosecution and/or the permission will be liable for suspension or revocation if the permitted activity / activities is/are so carried on as to be or likely to be, in the opinion of the Municipal Commissioner or any duly authorized officer of the Corporation, a source of nuisance or danger to life, health or property.
21. I/We am/are aware that the suspension or revocation of this permission for any reason shall not prejudice or effect any claim or demand whatsoever of the Municipal Commissioner or any other Competent Authority of the Corporation, nor shall the permission holder be entitled in the event of the suspension or revocation of this permission to claim any refund of any payment whatsoever made by him hereunder, or to claim any damages against the Municipal Corporation of Greater Mumbai towards construction cost.
22. I/We am/are aware that the permission holder shall pay security deposit as may be prescribed from time to time (by the Corporation) for faithful observance of the conditions of permission and the same will be forfeited to the Municipal Treasury at the discretion of the Municipal Commissioner or any other competent authority of the Corporation in case of any of the conditions of this permission is infringed any time by the permission holder, or his agent or servant. The permission shall be treated as suspended till fresh security deposit is paid to Municipal Corporation. The permission holder shall also be liable for prosecution and/or the permission will be liable for suspension or revocation for such infringement of condition of permission.
- 22A. I/We am/are aware that on expiry of permission or in case of its revocation the permission holder shall remove the structure within 15 days thereof, failing which the Municipal Corporation of Greater Mumbai, or officers empowered will be entitled to take necessary action to demolish and remove the same without any notice and to recover the demolition charges from permission holder.
23. I/We am/are aware that the permission is not transferable either as regards the persons to whom or the premises for which it is granted, without the written permission of the

Competent Officer of the Corporation.

24. I/We am/are aware that if the permission holder decides to discontinue the activities for which the permission is granted, he shall forthwith inform the Insecticide Officer that he is about to do so or has done so.
25. I/We am/are aware that the Brihanmumbai Municipal Corporation is entitled to add, alter or amend the conditions at any time at the discretion of the Municipal Commissioner or any other competent authority of the Brihanmumbai Municipal Corporation. In such event the permission holder shall abide the modified and/or additional conditions.

The above conditions will be binding on me / us, our administrators and assignees. I/We also comply with any other conditions of the other departments of Brihanmumbai Municipal Corporation if any.

Subject : Periodical inspection of the cisterns Nos. ....  
..... at .....

Sir,

Pest Control Officer, \_\_\_\_\_ Ward, reports that at his last attempt to inspect the water cisterns the terrace / traps door leading to them was found closed. No inspection was therefore possible.

This department has to inspect every week a collections of and receptacles for water such as wells, tanks, cisterns, etc., to ascertain if they are breeding mosquitoes and to take measures to destroy and prevent the same. Your cisterns must accordingly be inspected once a week.

I have, therefore, to request you to make arrangements to keep the said terrace / trap door open on every ..... between ..... to keep the key with some responsible person on the spot to enable the staff of the department to make the necessary inspection.

Yours faithfully,

Insecticide Officer
